Re: Manager of Workforce Development for Oakland County

Staff Finders is a staffing company located in Troy that focuses on Industrial Manufacturing. Over the last year, our company has been growing rapidly with new clients in the Western part of Oakland County, mostly in the New Hudson, Wixom, Novi and Milford area.

As a growing company, we have had to strategically maximize our efforts by building a strong relationship with different agencies in the area to help reach more candidates. One of these important relationships we have built is with the Oakland County Michigan Works! Southfield office. By partnering with the Southfield Michigan Works, we have been able to host multiple job fairs at their facility, thereby helping to put individuals looking for employment back to work.

Through job fairs at the Southfield Michigan Works, we have given over 50 individuals full-time employment in the manufacturing field. A lot of these individuals are still employed full-time presently. If we were not able to partner with the Southfield Michigan Works, it would have been very difficult to interview applicants for jobs in Western Oakland County due to transportation issues, i.e. not being able to make it to our office in Troy from where they reside.

As we continue to grow further, we plan to maintain our strong relationship with Jeffrey Granat and his wonderful, courteous team at Oakland County Michigan Works! Southfield.

Sincerely,

Matthew J Backaitis
