To whom it may concern,

After graduating in 2018 from Ionia High School where I also attending Heartlands Instiute of Technology taking the Machine Tool Program, I knew I wanted to pursue a career where I could use my hands and mind. Prior to graduating, Greenville Tool & Die contacted me per a recommendation from my machine tool instructor and offered me an opportunity of employment upon graduation. Growing up on a dairy farm I had a good work ethic and hands on experience. With self guidance and family support I knew working on the farm was not what I wanted to do for a carrer. So with visiting Greenville Tool and talking with them, I took the job opportunity at Greenville Tool & Die in their tool & die apprenticeship program. The on-the-job training has helped tremendously, along with the related instruction.

Through the apprenticeship program; on-the-job training and related instruction at the local college, I will be able to expand my knowledge. This will help make me a better die maker. I will become more efficient and productive.

All the people here at Greenville Tool & Die are great to work with, very knowledgeable, and awesome when teaching the tool & die skills. Additionally they are open to new ideas and technology.

I look forward to taking this knowledge and experience, along with receiving my journeyman card and continue toward a rewarding and successful career.

Any questions please contact me.

A handwritten signature in black ink, appearing to read "John Meyer". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
