

In partnership with the State of Michigan's Going Pro Grant, we have been able to expand our truck driver apprenticeship program. In 2019 we successfully graduated 22 Michigan based employees from forklift driving positions to Class A certified professional drivers.

How has this helped each of those new drivers? CDL training programs provide viable career options – to men, women, veterans, and the emerging workforce. These jobs pay well, provide outstanding benefits, and position employees to grow in a professional career.

How has this helped Holland? Our growth as a company is dependent upon growing our team of quality safe drivers. The funding of this program allows us to build our talent pool and achieve higher retention as a result of investing in employee development.

Michigan's Going Pro grant funds have been put to good use by employing Michigan residents with good paying jobs and health care benefits all while moving our state's commerce!
